Hi Erin,

I hope you're feeling better! I'm sure being sick with two little ones is no fun AT ALL.

I would love to touch base. We were not expecting this communication from the EPA at all.

Any specific time better for you?

Sarah

Hi Sarah,

No I don't think we received the data for the other monitoring wells from EPA. The hydrogeo report should be finalized soon (they are probably waiting on my comments).

I met with Andy Gremos and Bob Lewis regarding the Genuine Parts site on Thursday—Andy indicated that they will be submitting a combined 3rd and 4th quarter 2010 monitoring report soon.

Do you want to talk after you have a conference call with AIMCO? I was out of the office most of last week with the flu. I should be in the office all week to chat. Let me know.

Thanks,

Erin Brittain

Subject: Recent Genuine Parts Quarterlies...?

Erin,

I'm struggling to find any of the recent Genuine Parts quarterlies on the VFC. The most recent stuff that I am finding is from 2009. Any hints on finding the recent stuff? (I do have the 2Q2010 report, you gave me a document number a while back for that one....)

Also, I know EPA provided us the groundwater analytical results from the split sampling event last June. Reviewing the lab report today, I realized that the data provided is solely for the residential wells sampled, and not for the monitoring wells on our Site. Was that data ever provided to us from the EPA?

Thanks!
Sarah
